

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- A2
1. (currently amended) A cellular telephone, comprising:
a cellular telephone module;
a piconet front end; and
a cordless telephone PSTN gateway role, in communication with said cellular telephone module and with said piconet front end;
wherein said cordless telephone PSTN gateway role allows a remote telephone piconet device to answer an incoming call to said cellular telephone over a piconet network.
 2. (original) The cellular telephone according to claim 1, further comprising:
a cordless telephone terminal role.
 3. (original) The cellular telephone according to claim 1, wherein:
said piconet front end is a BLUETOOTH device.
 4. (original) The cellular telephone according to claim 1, wherein:
said cordless telephone PSTN gateway role conforms with BLUETOOTH device standards.
 5. (currently amended) The cellular telephone according to claim 1, wherein:
said remote telephone piconet device is another cellular telephone.

6. (currently amended) The cellular telephone according to claim 1, further comprising:

an authorized terminal list including unique identification of at least one remote telephone piconet device permitted to answer incoming calls to said cellular telephone.

7. (original) The cellular telephone according to claim 1, wherein: said piconet network includes a scatternet connection.

8. (currently amended) A method of remotely answering an incoming call to a cellular telephone over a wireless piconet network, comprising:

establishing a piconet network including said cellular telephone and a remote telephone piconet device;

routing audio from said cellular telephone to said remote telephone piconet device over said wireless piconet network.

9. (currently amended) The method of remotely answering an incoming call to a cellular telephone over a wireless piconet network according to claim 8, further comprising:

performing call establishment functions from said cellular telephone under control of said remote telephone piconet device.

10. (original) The method of remotely answering an incoming call to a cellular telephone over a wireless piconet network according to claim 8, wherein:

said audio is BLUETOOTH audio.

11. (original) The method of remotely answering an incoming call to a cellular telephone over a wireless piconet network according to claim 8, wherein:

said establishing said piconet network includes establishment of a scatternet connection.

12. (currently amended) The method of remotely answering an incoming call to a cellular telephone over a wireless piconet network according to claim 8, further comprising:

establishing in said cellular telephone a list of authorized remote telephone piconet devices permitted to remotely answer incoming calls to said cellular telephone.

13. (currently amended) Apparatus for remotely answering an incoming call to a cellular telephone over a wireless piconet network, comprising:

means for establishing a piconet network including said cellular telephone and a remote telephone piconet device; and

means for routing audio from said cellular telephone to said remote telephone piconet device over said wireless piconet network.

14. (currently amended) The apparatus for remotely answering an incoming call to a cellular telephone over a wireless piconet network according to claim 13, further comprising:

means for performing call establishment functions from said cellular telephone under control of said remote telephone piconet device.

15. (original) The apparatus for remotely answering an incoming call to a cellular telephone over a wireless piconet network according to claim 13, wherein:

said audio is BLUETOOTH audio.

16. (original) The apparatus for remotely answering an incoming call to a cellular telephone over a wireless piconet network according to claim 13, wherein:

said means for establishing said piconet network establishes a scatternet connection.

17. (currently amended) The apparatus for remotely answering an incoming call to a cellular telephone over a wireless piconet network according to claim 13, further comprising:

means for establishing in said cellular telephone a list of authorized remote telephone piconet devices permitted to remotely answer incoming calls to said cellular telephone.

A2
18. (currently amended) A method of allowing a remote telephone piconet device answer an incoming call to a wireless telephone in communication with said piconet device, comprising:

passing incoming call information from said wireless telephone receiving an incoming call, to said remote telephone piconet device over a wireless piconet; and

audibly ringing said remote telephone piconet device in response to receipt of said incoming call information by said wireless telephone.

19. (currently amended) The method of allowing a remote piconet device answer an incoming call to a wireless telephone in communication with said piconet device according to claim 18, further comprising:

audibly ringing said wireless telephone together with said remote telephone piconet device in response to said receipt of said incoming call information by said wireless telephone.

20. (currently amended) The method of allowing a remote piconet device answer an incoming call to a wireless telephone in communication with said piconet device according to claim 18, further comprising:

audibly ringing at least two remote telephone piconet devices in response to receipt of said incoming call information by said wireless telephone.

21. (original) The method of allowing a remote piconet device answer an incoming call to a wireless telephone in communication with said piconet device according to claim 18, wherein:

said wireless piconet is a BLUETOOTH piconet network.

A2) 22. (original) The method of allowing a remote piconet device answer an incoming call to a wireless telephone in communication with said piconet device according to claim 18, wherein:

said incoming call information includes a ring indication.

23. (currently amended) Apparatus for allowing a remote telephone piconet device answer an incoming call to a wireless telephone in communication with said piconet device, comprising:

means for passing incoming call information from said wireless telephone receiving an incoming call, to said remote telephone piconet device over a wireless piconet; and

means for audibly ringing said remote telephone piconet device in response to receipt of said incoming call information by said wireless telephone.
